Mechanisms of Ageing and Development
108 (1999) 255–258

mechanisms of ageing and development

Subject index of volume 108

Advanced glycation; Galactose; Aging model; Neurological aging; Aminoguanidine **108**, 239

Age dependance in different organs; DNA-protein crosslinks; Mouse; Senescence acceleration **108**, 99

Ageing; Cholecystokinin; Computerised image analysis; Duodenum; Endocrine cells; Immunohistochemistry; Morphometry; Serotonin; Somatostatin **108**, 39

Ageing; Computerized image analysis; Endocrine cells; Immunocytochemistry; Rectum **108**, 219

Ageing; DNA damage; Comet test; Antioxidants **108**, 9

Aging; Astrocyte; Cerebellar cortex; Glial fibrillary acidic protein; Immunohistochemistry; Image analysis **108**, 165

Aging; Development; Neuronal number; Neuronal cross-sectional area; Optical density **108**, 49

Aging; Exercise; Hypertrophy; Isoenzymes; Lactate dehydrogenase; Myocardium; Temperature **108**, 61

Aging; Lipogenesis; Thyroid hormone **108**, 139

Aging; Rigorous exercise; Superoxide dismutase; SOD isoenzymes; Oxidative stress **108**, 207

Aging; T-cell immunity; Immunodeficiency **108**, 183

Aging model; Galactose; Advanced glycation; Neurological aging; Aminoguanidine **108**, 239

Aging rats; Serum proteins; Aspartic salts; Radiation **108**, 127

Ag-NORs; Mamillary bodies; Optical fractionator; Cavalieri principle **108**, 113

Aminoguanidine; Galactose; Aging model; Advanced glycation; Neurological aging **108**, 239

Anterior endoderm; Cardiogenesis; FGF receptor antibody; Precardiac mesoderm; Sodium chlorate **108**, 77

Antioxidants; DNA damage; Comet test; Ageing **108**, 9

Aspartic salts; Serum proteins; Aging rats; Radiation **108**, 127

Astrocyte; Cerebellar cortex; Glial fibrillary acidic protein; Aging; Immunohistochemistry; Image analysis **108**, 165

Carbon tetrachloride hepatotoxicity; Interleukin-1β; Interleukin-6; Tumor necrosis factor-α; Rat liver **108**, 173

Cardiogenesis; Anterior endoderm; FGF receptor antibody; Precardiac mesoderm; Sodium chlorate **108**, 77

Cavalieri principle; Mamillary bodies; Optical fractionator; Ag-NORs **108**, 113

CD16; CD95; Chemotaxis; Elderly; Immunosenescence; NK; Superoxide **108**, 25

CD95; CD16; Chemotaxis; Elderly; Immunosenescence; NK; Superoxide **108**, 25

PII: S0047-6374(99)00029-9

Cellular aging; Prostaglandin E_2; COX-2; Mechanical stress; Periodontal ligament cells **108**, 151

Cerebellar cortex; Astrocyte; Glial fibrillary acidic protein; Aging; Immunohistochemistry; Image analysis **108**, 165

c-*fos*; Senescence-accelerated mouse; SAMP6 mice; Parathyroid hormone; Low peak bone mass; Senile osteoporosis **108**, 87

Chemotaxis; CD16; CD95; Elderly; Immunosenescence; NK; Superoxide **108**, 25

Cholecystokinin; Ageing; Computerised image analysis; Duodenum; Endocrine cells; Immunohistochemistry; Morphometry; Serotonin; Somatostatin **108**, 39

Chondrocytes; Growth plate; Tetraploidy; Giant cells; Mitotic death **108**, 227

Comet test; DNA damage; Antioxidants; Ageing **108**, 9

Computerised image analysis; Ageing; Cholecystokinin; Duodenum; Endocrine cells; Immunohistochemistry; Morphometry; Serotonin; Somatostatin **108**, 39

Computerized image analysis; Ageing; Endocrine cells; Immunocytochemistry; Rectum **108**, 219

COX-2; Cellular aging; Prostaglandin E_2; Mechanical stress; Periodontal ligament cells **108**, 151

Development; Aging; Neuronal number; Neuronal cross-sectional area; Optical density **108**, 49

DNA damage; Comet test; Antioxidants; Ageing **108**, 9

DNA-protein crosslinks; Age dependance in different organs; Mouse; Senescence acceleration **108**, 99

Duodenum; Ageing; Cholecystokinin; Computerised image analysis; Endocrine cells; Immunohistochemistry; Morphometry; Serotonin; Somatostatin **108**, 39

Elderly; CD16; CD95; Chemotaxis; Immunosenescence; NK; Superoxide **108**, 25

Endocrine cells; Ageing; Cholecystokinin; Computerised image analysis; Duodenum; Immunohistochemistry; Morphometry; Serotonin; Somatostatin **108**, 39

Endocrine cells; Ageing; Computerized image analysis; Immunocytochemistry; Rectum **108**, 219

Exercise; Aging; Hypertrophy; Isoenzymes; Lactate dehydrogenase; Myocardium; Temperature **108**, 61

FGF receptor antibody; Anterior endoderm; Cardiogenesis; Precardiac mesoderm; Sodium chlorate **108**, 77

Galactose; Aging model; Advanced glycation; Neurological aging; Aminoguanidine **108**, 239

Giant cells; Growth plate; Chondrocytes; Tetraploidy; Mitotic death **108**, 227

Glial fibrillary acidic protein; Astrocyte; Cerebellar cortex; Aging; Immunohistochemistry; Image analysis **108**, 165

Growth plate; Chondrocytes; Tetraploidy; Giant cells; Mitotic death **108**, 227

Hypertrophy; Aging; Exercise; Isoenzymes; Lactate dehydrogenase; Myocardium; Temperature **108**, 61

Image analysis; Astrocyte; Cerebellar cortex; Glial fibrillary acidic protein; Aging; Immunohistochemistry **108**, 165

Immunocytochemistry; Ageing; Computerized image analysis; Endocrine cells; Rectum **108**, 219

Immunodeficiency; Aging; T-cell immunity **108**, 183

Immunohistochemistry; Ageing; Cholecystokinin; Computerised image analysis; Duodenum; Endocrine cells; Morphometry; Serotonin; Somatostatin **108**, 39

Immunohistochemistry; Astrocyte; Cerebellar cortex; Glial fibrillary acidic protein; Aging; Image analysis **108**, 165

Immunosenescence; CD16; CD95; Chemotaxis; Elderly; NK; Superoxide **108**, 25

Interleukin-6; Interleukin-1β; Tumor necrosis factor-α; Carbon tetrachloride hepatotoxicity; Rat liver **108**, 173

Interleukin-1β; Interleukin-6; Tumor necrosis factor-α; Carbon tetrachloride hepatotoxicity; Rat liver **108**, 173

Isoenzymes; Aging; Exercise; Hypertrophy; Lactate dehydrogenase; Myocardium; Temperature **108**, 61

Lactate dehydrogenase; Aging; Exercise; Hypertrophy; Isoenzymes; Myocardium; Temperature **108**, 61

Lipogenesis; Thyroid hormone; Aging **108**, 139

Low peak bone mass; Senescence-accelerated mouse; SAMP6 mice; Parathyroid hormone; c-*fos*; Senile osteoporosis **108**, 87

Mamillary bodies; Optical fractionator; Cavalieri principle; Ag-NORs **108**, 113

Mechanical stress; Cellular aging; Prostaglandin E_2; COX-2; Periodontal ligament cells **108**, 151

Mitotic death; Growth plate; Chondrocytes; Tetraploidy; Giant cells **108**, 227

Morphometry; Ageing; Cholecystokinin; Computerised image analysis; Duodenum; Endocrine cells; Immunohistochemistry; Serotonin; Somatostatin **108**, 39

Mouse; Age dependance in different organs; DNA-protein crosslinks; Senescence acceleration **108**, 99

Myocardium; Aging; Exercise; Hypertrophy; Isoenzymes; Lactate dehydrogenase; Temperature **108**, 61

Neurological aging; Galactose; Aging model; Advanced glycation; Aminoguanidine **108**, 239

Neuronal cross-sectional area; Aging; Development; Neuronal number; Optical density **108**, 49

Neuronal number; Aging; Development; Neuronal cross-sectional area; Optical density **108**, 49

NK; CD16; CD95; Chemotaxis; Elderly; Immunosenescence; Superoxide **108**, 25

Optical density; Aging; Development; Neuronal number; Neuronal cross-sectional area **108**, 49

Optical fractionator; Mamillary bodies; Cavalieri principle; Ag-NORs **108**, 113

Oxidative stress; Aging; Rigorous exercise; Superoxide dismutase; SOD isoenzymes **108**, 207

Parathyroid hormone; Senescence-accelerated mouse; SAMP6 mice; c-*fos*; Low peak bone mass; Senile osteoporosis **108**, 87

Periodontal ligament cells; Cellular aging; Prostaglandin E_2; COX-2; Mechanical stress **108**, 151

Precardiac mesoderm; Anterior endoderm; Cardiogenesis; FGF receptor antibody; Sodium chlorate **108**, 77

Prostaglandin E_2; Cellular aging; COX-2; Mechanical stress; Periodontal ligament cells **108**, 151

Radiation; Serum proteins; Aging rats; Aspartic salts **108**, 127

Rat liver; Interleukin-1β; Interleukin-6; Tumor necrosis factor-α; Carbon tetrachloride hepatotoxicity **108**, 173

Rectum; Ageing; Computerized image analysis; Endocrine cells; Immunocytochemistry **108**, 219

Rigorous exercise; Aging; Superoxide dismutase; SOD isoenzymes; Oxidative stress **108**, 207

SAMP6 mice; Senescence-accelerated mouse; Parathyroid hormone; c-*fos*; Low peak bone mass; Senile osteoporosis **108**, 87

Senescence-accelerated mouse; SAMP6 mice; Parathyroid hormone; c-*fos*; Low peak bone mass; Senile osteoporosis **108**, 87

Senescence acceleration; Age dependance in different organs; DNA-protein crosslinks; Mouse **108**, 99

Senile osteoporosis; Senescence-accelerated mouse; SAMP6 mice; Parathyroid hormone; c-*fos*; Low peak bone mass **108**, 87

Serotonin; Ageing; Cholecystokinin; Computerised image analysis; Duodenum; Endocrine cells; Immunohistochemistry; Morphometry; Somatostatin **108**, 39

Serum proteins; Aging rats; Aspartic salts; Radiation **108**, 127

SOD isoenzymes; Aging; Rigorous exercise; Superoxide dismutase; Oxidative stress **108**, 207

Sodium chlorate; Anterior endoderm; Cardiogenesis; FGF receptor antibody; Precardiac mesoderm **108**, 77

Somatostatin; Ageing; Cholecystokinin; Computerised image analysis; Duodenum; Endocrine cells; Immunohistochemistry; Morphometry; Serotonin **108**, 39

Superoxide; CD16; CD95; Chemotaxis; Elderly; Immunosenescence; NK **108**, 25

Superoxide dismutase; Aging; Rigorous exercise; SOD isoenzymes; Oxidative stress **108**, 207

T-cell immunity; Aging; Immunodeficiency **108**, 183

Temperature; Aging; Exercise; Hypertrophy; Isoenzymes; Lactate dehydrogenase; Myocardium **108**, 61

Tetraploidy; Growth plate; Chondrocytes; Giant cells; Mitotic death **108**, 227

Thyroid hormone; Lipogenesis; Aging **108**, 139

Tumor necrosis factor-α; Interleukin-1β; Interleukin-6; Carbon tetrachloride hepatotoxicity; Rat liver **108**, 173
